

Gray Squirrels

Iris

Description

- They have fluffy tails, four front teeth, and pointy ears.
- They are grey, black or white.
- They also have short legs, sharp claws, and dark eyes.

Food

- Most gray squirrels eat beechnuts, acorns, butternuts, black cherries, cherry blossoms and hickory nuts.

Habitat

- They live in a nest.
- Their predators are rat, snakes, red foxes, bobcats, raccoons, red tailed hawks, and the great horned owl.

Life Cycle

- Their nests are called dreys.
- Grey squirrels live in Canada and the United States.

Fun Facts

- Did you know that gray squirrels were once a pet?
