

My Rainforest Trek

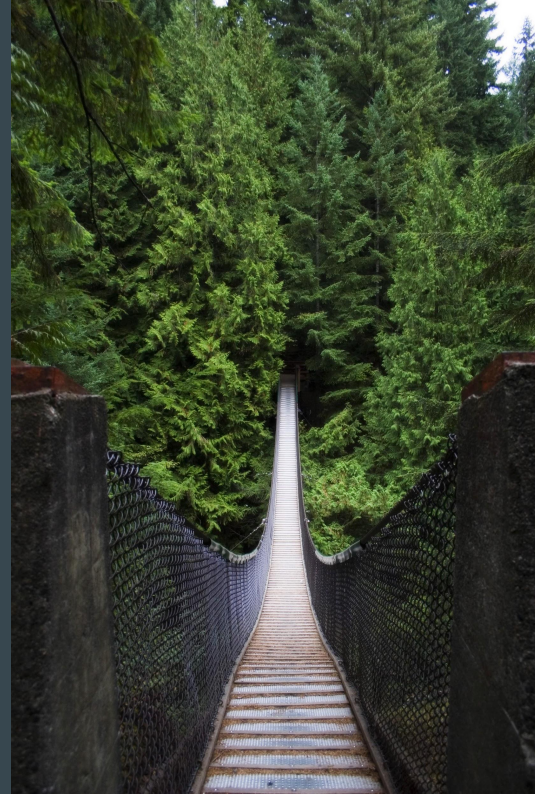

Coati

The coati just crossed the road.
Coatis eat nuts.

Hanging bridge

I feel nervous. I saw a monkey.

Hercules beetle

I almost stepped on it. It was bigger than my hand.

Hourglass frog

It is so small. It is yellow and brown.

Spider monkey

They hang by their tail. The baby hangs on to its mother. They live in troops.

Banana plant and ferns

The banana plants are big. The fern is bumpy.

Longwing butterfly

The longwing butterfly lays eggs on the passion flower.

Hummingbird nest

I took out my binoculars and saw a hummingbird.

White-faced monkey

Did you see that monkey jump 10 feet? It's eating palm fruit.
