

My Rainforest Trek

Spider monkeys

Spider monkeys live in trees and they look for food. They eat. They have a tail.
Spiders spider monkeys are social.

Coati crossing

A coati eats fruits nuts and mice seeds from plants.

Banana plant and ferns

Plants grow close together.

Longwing butterfly

They drink pollen and nectar.

The Hanging Bridge

The hanging bridge is very long and it has a little rust on it. At the end it has a dark cave and it is very small!

Hummingbird Nest

They are small and you need binoculars to see them!

White Faced monkey

They eat palm food it also eats bird eggs.

Hercules beetle

They eat on the ground. It eats dead wood it is also bigger than your hand!

Hourglass Frog

It hides by leaves.
