

MY RAINFOREST TREK

by

COATI CROSSING

A coati just crossed the path. It eats nuts and seeds.

HANGING BRIDGE

I was just on a bridge. I was so happy. Wait! I just saw a monkey.

HOURGLASS FROG

Oh I almost stepped on this hourglass frog. By sitting still it might catch a moth to eat.

WHITE FACE MONKEY

Oh my gosh did you see that monkey jump really high? It lives in groups of 20 to 30.

BANANA PLANT AND FERNS

The banana plant is long. The fern is wide.

HUMMINGBIRD NEST

Look through your binoculars! It has a red beak.

LONGWING BUTTERFLY

The longwing butterfly lays its egg on the passion flower plant.

HERCULES BEETLE

I almost ran into the hercules beetle it finds its food on the forest floor. It is bigger than your hand and it is black.
