

RAINFOREST TREK

HANGING BRIDGE

I am walking on a rickety bridge. I hope the step does not fall. Ha! Don't look down. We are high up!

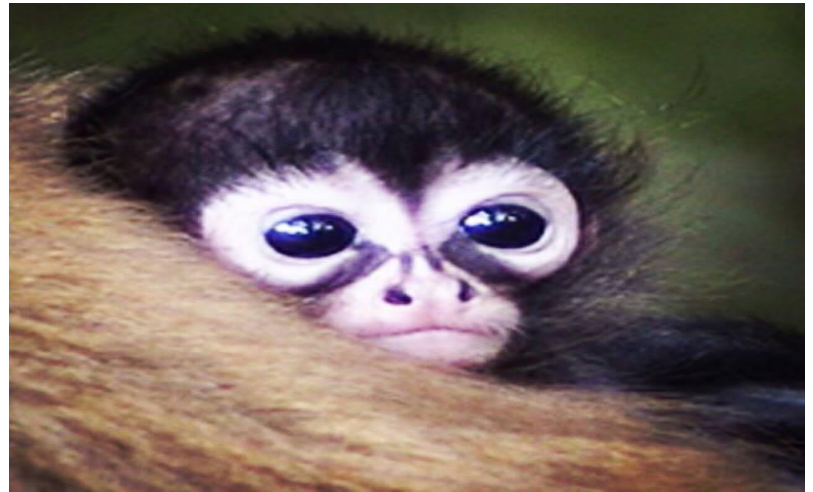

WHITE-FACED MONKEY

It eats palm fruit. It also eats seeds and insects. They can be in large groups of 10 – 35 monkeys. They can jump from the floor to the ceiling. The monkey is black and white.

SPIDER MONKEY WITH HER BABY

Spider monkey hang from their tail. The baby monkey hangs from her mom. They live in the trees. They can easily hang from branches. They live in groups called troops.

COATI

Coatis eat the fruits and nuts from the rainforest. Coatis are brown, tan, and white. Their tail has a pattern of brown and white. It has a black nose.
